New and Improved Sway Bar Link Product Offering

Various Applications

Overview

MOOG® Problem Solver® barrel lock nut sway bar link kits are replacing many traditional sway bar link kits depending on the application. This newer style saves time and is easier to install than traditional sway bar link kits. An additional benefit of this new line is improved inventory control with less SKUs (18 part numbers versus 43 traditional part numbers) and optimal coverage.

TRADITIONAL STYLE

IMPROVED MOOG® PROBLEM SOLVER® STYLE

Easier to Install

MOOG® Problem Solver® components feature patented molded bushings that center and hold the coated washers into place, making them easier to install. Instead of a standard nut, MOOG Problem Solver uses a 1" barrel lock nut that can easily be threaded on, even if the bolt end is flush with the washer.

TRADITIONAL STYLE NUT

MOOG PROBLEM SOLVER BARREL LOCK NUT MAKES INSTALLATION EASIER

Improved Inventory Control

In addition to providing easier installation in the shop, distributors and stocking jobbers will also benefit as the enhanced product will result in reduced SKUs versus the traditional product. Over the next couple months, MOOG will phase out 38 traditional style sway bar links and replace with the Problem Solver design. This SKU count of the new line will comprise of only 18 part numbers covering the same applications.

Industry-Leading Coverage

MOOG will continue to offer a streamlined offering of 24 traditional style sway bar links along with the 18 part numbers in the enhanced MOOG Problem Solver barrel lock nut style sway bar links line. This will result in a comprehensive product offering with optimal coverage to meet both the needs of distributors and technicians covering more than 14 million Vehicles In Operation (VIO).
